Looking east, bikeway on the right, proposed trail on the left.

A

(Existing)

Current informal route to be restored.

C

6ft

Trail would parallel the bikeway, tightly following the disturbed area shown on the right.

Bayside Birding and Walking Trail

Proposed Trail Alignment

Proposed Observation Point

N
W   E
S

50   0   50   100   150 Feet

D

Informal routes would be restored with high-marsh and upland vegetation. Both bare areas shown in C & D equate to 0.2 acres.

(Future)

Bayshore Bikeway

7th Street

Delaware Street

8th Street

B

Proposed trail would be constructed at the south edge of the existing informal route in this area.

E

Proposed trail would follow current informal route in this location. In environmentally sensitive areas, post and cable fencing would be installed north of the trail.

Bayside Birding and Walking Trail

Proposed Trail Alignment

Proposed Observation Point

50   0   50   100   150 Feet

G

Proposed trail would be below the bike-way in this area. Future plans include restoration of the surrounding area to native upland vegetation.

H

A 50-foot long bridge would span this existing tidally influenced drainage channel.

I

Proposed trail would terminated at 10th Street where a 750-square-foot observation area would be provided for wildlife observation. Future public parking is proposed here to the south of the bikeway.

F

Proposed pathway approaching 8th Street in Imperial Beach. An observation point is proposed here as part of a future project.

(Future)

8th Street

Bayshore Bikeway
